

Street Interchange Application Enhancements

1. **New SIA Archival Screen** – All street turn and street interchange transactions older than the current year will now be maintained under an **“SIA ARCHIVAL”** search option. If a user needs to access transactions within the application older than the current year, they would use the new ARCHIVAL SEARCH feature. For now this would mean any transactions maintained within the application that are older than January 1, 2018 would be available under the new ARCHIVAL SEARCH feature. A new icon will be added to the top and left menu for this new functionality. The new feature will further enhance the performance of the application during searches.

The screenshot shows the SIA Street Interchange Application home screen. At the top right, it says "Welcome HDMU" and "Last Login : 07/05/2018 10:42:28 IP Address : 192.168.100.117". The top navigation bar contains several icons, including a magnifying glass icon for search, which is highlighted with a red box and labeled "New ARCHIVAL SEARCH ICON". Below the navigation bar, there are two main cards: "Secondary Users" with a count of 0 and "Third Party Users" with a count of 52. A blue banner at the top of the main content area says "Quick Street Turn (Single motor carrier wanting to re-use import for an export move)" and "CK HERE". A red arrow points from the "New ARCHIVAL SEARCH ICON" label to the magnifying glass icon in the top navigation bar. Another red arrow points from the "Also on Side Navigation Bar New ARCHIVAL SEARCH ICON" label to the magnifying glass icon in the side navigation bar.

2. **Link to QUICK STREET TURN** - Per the request of Equipment Providers using the system, we have added the link to the QUICK STREET TURN feature on the EP side of the application. Currently this button was only available to Motor Carriers. By clicking the QUICK STREET TURN option, it will take the user to a screen where only specific fields will be requested to initiate a street turn. The screen will pre-populate the Equipment Provider's company name based on the logged in user.

The screenshot shows the SIA Street Interchange Application Quick Street Turn form. At the top right, it says "Welcome HDMU" and "Last Login : 06/29/2018 15:00:21 IP Address : 192.168.100.116". The top navigation bar contains several icons, including a magnifying glass icon for search, which is highlighted with a red box and labeled "Access to Quick Street Turn Icon". Below the navigation bar, there is a blue banner that says "Quick Street Turn (Single motor carrier wanting to re-use import for an export move)" and "CLICK HERE". The form is divided into two main sections: "Street Turn Details" and "Original Interchange Location". The "Street Turn Details" section has fields for "Motor Carrier A's Name*" (SCAC*), "Container Provider Name*" (SCAC*), and "Container Number*" (Export Booking Number* and Import B/L). The "Original Interchange Location" section has fields for "Location Name (or Zip Code)*", "Location Address*", "City*", "State*", and "Zip Code*". A red arrow points from the "Access to Quick Street Turn Icon" label to the magnifying glass icon in the top navigation bar. Another red arrow points from the "Also on side navigation bar - Access to Quick Street Turn Icon" label to the magnifying glass icon in the side navigation bar.

3. **Search by MC SCAC** - A new SEARCH parameter has been added based on requests received from Equipment Providers. The new feature will allow an Equipment Provider to search SIA transactions by MC A or MC B SCAC Codes. By entering a SCAC in the new search field, the system will return all transactions associated with that specific SCAC Code in the application whether it be for MC A or MC B.

The screenshot shows the 'Search Interchange Request' form in the SIA application. The form is organized into a grid of input fields. The 'Motor Carrier's SCAC' field is highlighted in yellow. Other fields include 'Type of Interchange', 'Equipment Location Name', 'Original Interchange Location City', 'Container Type', 'Status', 'Start Date', 'Container Provider's SCAC', 'Equipment Location City', 'Original Interchange Location State', 'Container Size', 'Action Required', 'End Date', 'Chassis Number', 'Equipment Location State', 'Chassis Type', 'Export Booking Number', 'Request Type', 'Container Number', 'Original Interchange Location Name', 'Chassis Size', 'Genset Number', and 'Chassis EP'. There are 'SEARCH' and 'RESET' buttons at the bottom of the form.

4. **SIA TPU Registration – MC Validation** - A new validation has been added to the Third Party User registration to hopefully avoid Motor Carriers inadvertently registering under this feature. If the user selects that they are a Motor Carrier they will receive an error message advising them that they need to log into their UIIA account to access the Street Interchange Application. We have also cleaned up all the third party users that were old and not applicable to the Equipment Providers using the SIA system and also now display the third party users in alpha order.

The screenshot shows the 'TPU Registration' form in the SIA application. The form is divided into three sections: 'Basic Details', 'Address Details', and 'User Account Details'. The 'Basic Details' section includes fields for 'Company Type*' (with 'Motor Carrier' selected), 'First Name*', 'Middle Name', 'Last Name', 'Email*', 'Phone*', and 'Fax*'. The 'Address Details' section includes 'Address Line1*' and 'Address Line2'. The 'User Account Details' section includes 'Username*', 'Password*', and 'Confirm Password*'. An error message overlay is displayed in the foreground, stating: 'TPU Registration', 'You can not proceed with this registration for third party user. If you are UIIA participant, Please login into your motor carrier account of UIIA application. Kindly follow below steps: 1) Login into UIIA application, 2) Click on IANA Street Interchange Application from the left navigation, 3) You will be redirected to your Street Interchange account.' There are 'OK' and 'CANCEL' buttons at the bottom of the error message.

5. **Remark Field** – The “**Remark Field**” on the detailed street turn and street interchange screen currently can only be used for rejected transactions. Based on user feedback, we have opened the “Remark Field” up so that it can now be used by all users for any type of transaction should the user need to put comments related to the transaction.
6. **Originating Interchange Location Search** – Users currently have to search for the Original Interchange Location by Location Name or Zip Code. We have added the ability for users to also now search by “City”. This feature will be available for both street turn and street interchange transactions.

7. **Access to MC Contact Details** – A new feature has been added on the Search Results screen that will allow the EP to click on MC’s SCAC Code and have the UIIA Contact Details for that specific trucking company be displayed in a pop-up window. **This feature is for Equipment Providers only.**

MC Contact Details	
Primary Contact	Jon Miller
Title	Director, Equipment Control
Primary Phone	(440)333-1330 Ext: 1158
Primary Fax	(440)333-9413
Primary Email	intermodal.mc@gmail.com
Address Line 1	11785 Beltsville Dr.
Address Line 2	Suite 1100
City	Calverton
State	MD
Zip	20705

Click on MC SCAC Code from Search Result screen and then Pop-box with UIIA Details will appear
